HONEST PERSPECTIVE

What happens when your AI stops flattering you

TWINGENIE COGNITIVE STUDY

Most leaders operate with unchecked cognitive habits. Here is what persistent self-reflection reveals about your decision loop.

BIAS TRAP

The Problem With Flattery AI

CONFIRMATION BIAS RISK

Conventional chat assistants agree with everything you say. They reinforce confirmation bias rather than stress-testing your judgment.

ARCHITECTURE

The Four-Perspective Mirror

4 PERSPECTIVES OVER 1 CONTEXT

TwinGenie maintains one shared memory pipeline across 4 conversational lenses: Normal (baseline), Reflective (empathy), Honest (unfiltered), and Future (5 years wiser).

DEEP MEMORY

Longitudinal Memory in Action

SEMANTIC PATTERN RECOGNITION

By using pgvector semantic retrieval, the model tracks your patterns across weeks—spotting recurring triggers before you even notice them.
